

## Do I need to get it?

---

The following kinds of people need to get Subversion:

- anyone doing development on an *openEHR* project, i.e. anyone committing changes
- anyone who wants to obtain copies of the Subversion repositories for whatever reason

Details on getting and using Subversion for use with *openEHR* are available [here](#)<sup>1</sup>.

People simply wishing to view the latest version of a repository may use the web interface, available from the "repositories" button on the [home page](#)<sup>2</sup>.
