

Rong Chen

Rong Chen, MD

- Chief Medical Informatics Officer, [Cambio Healthcare Systems](http://www.cambio.se)¹
- Project leader, [openEHR Java Reference Implementation Project](http://www.openehr.org/projects/java.html)²

Rong received a Bachelor of Medicine degree from Shanghai Medical University in 1997 and practiced two years in General Thoracic Surgery before he came to Sweden to pursue a career in Medical Informatics. He played many roles in different health IT projects in Stockholm area over the years. He is currently working for Cambio Healthcare Systems and plays a role of CMIO in leading R&D activities and defining next generation products.

In 2004 he led the development of a Java implementation of *openEHR*, which later became open source and adopted as the *openEHR* Reference Java Implementation. He is the author of the *openEHR* Java Implementation Technology Specification and has contributed to several design specifications based on his extensive implementation experience. He is in his final year of a PhD program (EHR semantic interoperability) at the [Linköping](http://www.ln.uu.se)³ University and published several papers on EHR and archetypes.
