

Opereffa Project

Description

Opereffa stands for *openEHR* REFERENCE Framework and Application. It is a project for creating an open source clinical application which will be driven by the Clinical Review Board of openEHR. The clinical application will be built on top of a Java based open source framework, which is using the existing open source Java reference implementation of openEHR.

Vital Statistics

Project Team	Seref Arikan ¹ , Dr. Tony Shannon (chair <i>openEHR</i> CRB ²), Professor David Ingram (Chair <i>openEHR</i> Foundation, HoD, CHIME, UCL)
Project Mailing list	Technical discussions - openehr-implementers@openehr.org ³ Clinical discussions - openehr-clinical@openehr.org ⁴
Language(s) & Technologies	Java 1.6, Apache Tomcat, Postgresql RDMS, Eclipse development environment & Platform, Eclipse BIRT
Downloads	http://sourceforge.net/projects/opereffa
Issue reporting	Problem Reporting (public) ⁶
Source repository	http://www.openehr.org/svn/opereffa
Documentation	http://opereffa.chime.ucl.ac.uk ⁸
Status	Release 0.1
